NCSA in cooperation with SEI and the US Department of State conducts training on Risk Management in Organizations

Increasing the capacities for risk assessment and management in cyber security is one of the objectives of the National Authority for Cyber Security (NCSA).

For this purpose, on June 3-5, the National Cyber Security Authority in collaboration with the Software Engineering Institute (SEI) and with the support of the US Department of State, organized the onsite and online training on "Enterprise Risk Management".

This training was developed with the participation of employees profiled in IT/ICT/cyber security and instructors from the Software Engineering Institute (SEI), Carnegie Mellon University.

Online Webinar on "Cybersecurity Governance and Standards"

The National Authority for Cyber Security will organize the next webinar with the Topic: "Cyber Security Governance and Standards".

Whether you are a seasoned professional or just starting your journey, this webinar is for you and will provide you with the knowledge to:What are the strategies to manage cyber security governance and risks;

- What are the strategies to manage cyber security governance and risks;
- What are the main standards in information security management and their role in maintaining security;
- Key steps to effectively implementing a Governance, Risk and Compliance (GRC) framework including risk assessment, policy development and employee training.

This information session will begin at:
- June 20, 15:00-16:00, Online, from Gerald Bici
